CPWE Logic Model

CPWE GOAL: To strengthen and expand the Texas public mental health workforce by increasing high-quality psychiatry residency training opportunities in public-sector community mental health settings that prepare residents to deliver care to diverse populations, navigate public systems of care, and enter the public mental health system after residency.

Inputs

- CPWE funding
- TCMHCC CPWE medical director and work group
- Established ACGME-compliant residency programs
- Residency program leadership
- Residency supervisors committed to CPWE training goals
- CPWE-funded HRI attending psychiatrists
- Psychiatry residents
- Clinical training sites, including Local Mental Health Authorities (LMHAs) and other community mental health clinics
- LMHA & community clinic patients
- Program coordinators and administrative staff

→

Activities

- HRI CPWE lead participates in CPWE leadership calls
- Review existing training sites and rotations for capacity to support psychiatry residents in public-sector community mental health settings
- Establish partnerships between HRIs and LMHAs or other community mental health clinics for resident training
- Maintain partnerships between HRIs and LMHAs or other community mental health clinics for resident training
- Coordinate and administer CPWE-supported residency rotations
- Residents are placed in public-sector community mental health rotations to provide clinical services

→

Outputs

of community clinic partnerships

CPWE leadership calls

CPWE leadership calls with HRI CPWE lead in attendance

HRI, LMHA and community mental health clinics, and resident satisfaction with coordination and administration of CPWE-supported residency rotations

# of unique residents and faculty on CPWE rotations

FTE of residents and faculty on CPWE rotations

# of patient care visits performed by CPWE residents and faculty

unique patients seen by CPWE residents and faculty

of patients seen by CPWE residents who are children or youth

Documentation of where graduates practice after completion

→

Short-Term Outcomes

↑ HRI/LMHA satisfaction in collaborating and coordinating on residency rotations

↑ trainee delivery of public-sector psychiatric care during residency training

↑ positive attitudes toward community psychiatry among residents

↑ residents' knowledge of non-medical drivers of health and how they influence mental health

↑ residents' knowledge of systems of care

↑ residents' intentions to practice
- Community psychiatry
- In Texas
- With children and adolescents

→

Intermediate Outcomes

↑ collaboration between HRIs and LMHAs/ community clinics on quality improvement

↑ community psychiatry residency training capacity across Texas

↑ graduates remaining in Texas after residency training

↑ graduates entering the public mental health workforce

↑ graduates practicing with children and adolescents

↑ clinic service capacity for children and adolescents through resident/faculty involvement

→

Long-Term Outcomes

↑ number of psychiatrists practicing in public or private non-profit community psychiatry in Texas

↑ long-term access to psychiatric care for underfunded and seriously mentally ill persons across the state

Strong and stable psychiatric workforce pipeline

↑ statewide public mental health system capacity
