TCMHCC Pediatric Collaborative Care Update

October 25, 2022

Collaborative Care Expansion | Metric Progress

As of September 30, 2022

CoCM Expansion Metric Progress

Collaborative Care Expansion | Accomplishments

Job Descriptions

- The Meadows Institute developed sample job descriptions for a Behavioral Health Care Manager and Psychiatric Consultant and provided these to HRIs to support the hiring process within health systems.

Roles and Responsibilities

- The Meadows Institute developed a resource outlining ARPA pediatric roles and responsibilities, including those of the HRI, the participating health system, and Meadows Institute.

Health System Assessment

- The Meadows Institute developed a Pediatric ARPA Health System Assessment document to serve as a guide for HRIs as they select health systems to participate in the initiative, including questions that could be used to assess a health system's current capacity for behavioral health integration or evidence-based enhancement of their current behavioral health integration practices.

Collaborative Care Expansion | Technical Assistance

Key Informant Interviews

- Leading interviews with Texas providers to better understand current state of ADHD assessment and measurement-based care.

TA Series

- Crafting a topically based TA series to support implementation

Pediatric Best Practices

- Meeting with national experts and conducting literature review to draft a best practices pediatric collaborative care model framework.

HRI Cohort

- Facilitated discussion reviewing roles, responsibilities, reporting template, and the health system components ideal for CoCM implementation

Collaborative Care Expansion | HRI Highlights

Held conversations
with several regional
health systems
interested in
implementing CoCM

Developed job
posting for
collaborative care
manager

Identified consulting
psychiatrists

Collaborative Care Expansion | Upcoming

Up Next
