OVERVIEW
Primary care providers (PCPs) have been tasked with managing the mental health needs of youth in Texas due to the severe shortage of child psychiatrists. However, many PCPs have had little training in screening, assessment, and care provision for youth with mental health disorders. This professional gap is largely due to limited exposure in medical school and compounded by inadequate mental health resources. The lack of mental health resources has resulted in primary care providers being the first and only source of assistance for youth and families that are suffering from mental or behavioral health concerns. This series is aimed to educate primary care physicians on how to recognize and diagnose mental health conditions in children and adolescents within their clinical practice.

Learning Objectives
Intro to Echo and Behavioral Health Consultations
At the conclusion of this activity, the participants should be able to:

- Recall how Project ECHO is designed to instruct primary care physicians in acquiring new knowledge and skills.
- Compare how Project ECHO is implemented in contrast to more standard learning models
- Develop a plan for utilization of Project ECHO to improve knowledge and skills for youth with common mental health disorders.

Assessment of Anger and Aggression
At the conclusion of this activity, the participants should be able to:

- Contrast the differences between anger and aggression
- List the benefits of anger
- Summarize the treatment options for aggression

REGISTER TODAY
Registration Link: https://app.smartsheet.com/b/form/13026eee782646b484c22239aa3f6533

Registration is limited and provided on a first come, first serve basis. You will receive a follow-up email advising on the status of admission into the Spring 2023 Project ECHO Cohort. If accepted, you will receive an email with course access and description details following registration.

Out of Control Kids – How to Advise Parents
At the conclusion of this activity, the participants should be able to:
• Define behavioral interventions for oppositional youth
• List basic concepts for parent management training
• List specific tools for behavior management

Psychological vs. Neuropsychological Assessment, when to ask for WHAT
At the conclusion of this activity, the participants should be able to:
• Outline the elements of a psychological evaluation
• Outline the elements of a neuropsychological evaluation
• Evaluate the common reasons to consider ordering either a psychological or neuropsychological evaluation

Eating Disorder
At the conclusion of this activity, the participants should be able to:
• Compare and contrast the different eating disorders most common in youth
• Determine the appropriate level of care based on the symptoms and eating disorder for the child or adolescent patient
• Summarize the assessment process and treatment options for common eating disorders in youth

Suicide Assessment and Safety Planning
At the conclusion of this activity, the participants should be able to:
• Recall the risk factors for suicidal thoughts and actions in youth
• List the evidence-based approaches to assessing suicidal thoughts and actions in youth
• Outline the components of a safety plan for youth with suicidal thoughts or actions

TARGET AUDIENCE
This activity is for Pediatricians and Primary Care Providers (Family Practitioners, NPs, PAs) who treat children and adolescents, RNs, LVNs, LPCs, Social Workers, and Administrative leaders.

EDUCATIONAL METHODS
Lecture and case discussion

ACTIVITY EVALUATION
Evaluation by questionnaire will address program content, presentation, and possible bias.

ACCREDITATION AND CREDIT DESIGNATION
This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of Baylor College of Medicine and Child Psychiatry Access Network (CPAN). Baylor College of Medicine is accredited by the ACCME to provide continuing medical education for physicians.

Baylor College of Medicine designates this live activity for a maximum of 6.00 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
